(Spain)**

## COLLABORATORS

Society of Road Safety Auditors – SoRSA (UK)

Fórum dos Auditores de Segurança Rodoviária – FASR  
(Portugal)

## PROMOTES

Diputacion Provincial de Zamora (Spain)

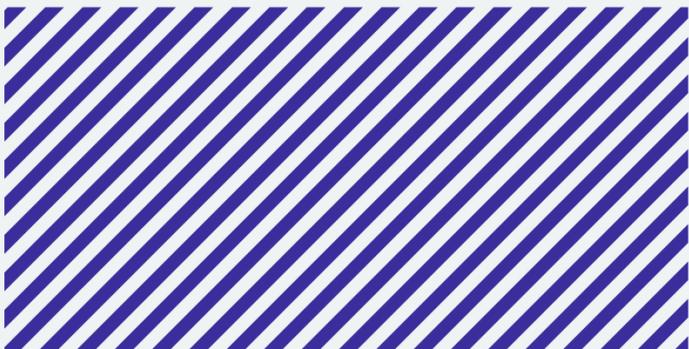

# Why an International Congress?

## TO ROAD SAFETY AUDITORS

---

For more than 10 years, the Independent Associations of Road Safety Auditors (SoRSA, FASR and ASEVI) have been working together to improve this global pandemic, traffic accidents, which takes a life in the world every 24 seconds. We cannot condemn to death penalty people whose only crime is to commit a "human error". It is our obligation to collaborate in building "roads that SAVE LIVES". It is time to join forces and with our work, to contribute to the substantial and effective improvement of Road Safety.

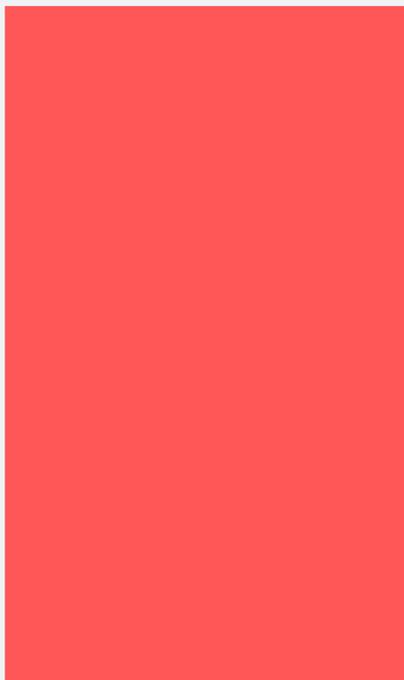

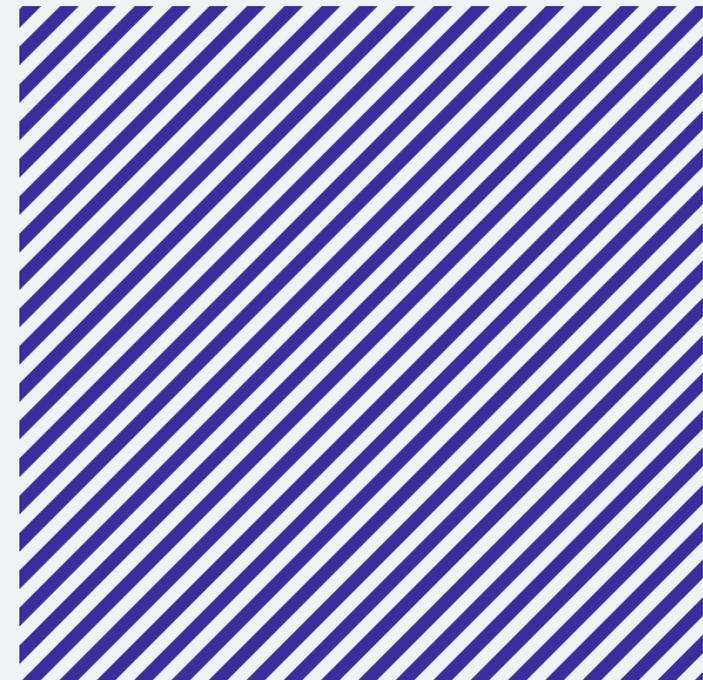

# Roads that save lives

---

## OUR CONCERN

According to United Nations data, road traffic accidents currently rank ninth among the leading causes of death worldwide, resulting in the annual loss of more than 1.2 million lives and causing severe injury to nearly 50 million of people a year around the world. Every 24 seconds a person dies from traffic accidents. The United Nations General Assembly proclaimed the period 2011–2020 "Decade of Action for Road Safety", with the overall objective of stabilizing and subsequently reducing the expected numbers of fatalities in road traffic accidents around the world, increasing activities at the national, regional and global levels.

# The Global Plan for the Decade of Action for Road Safety

2011 – 2020

---

To encourage Member States to carry out activities through the implementation of 5 pillars:

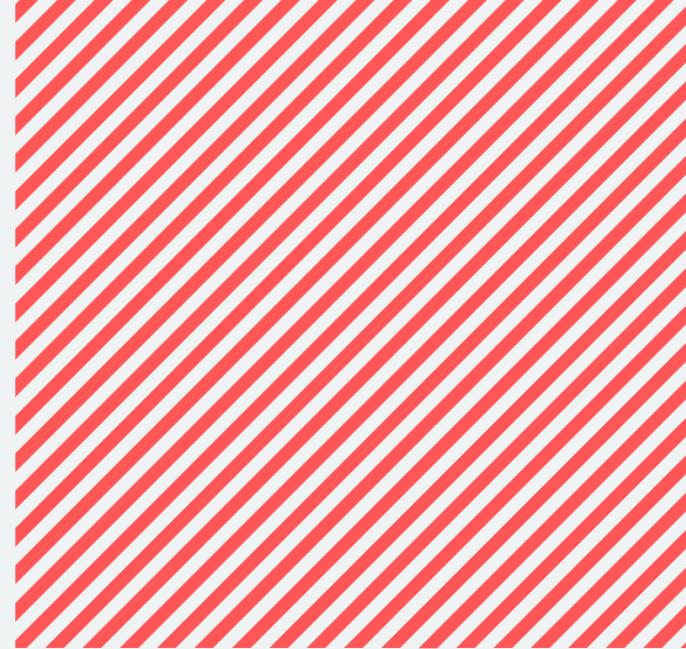

Pillar 1: Road Safety Management

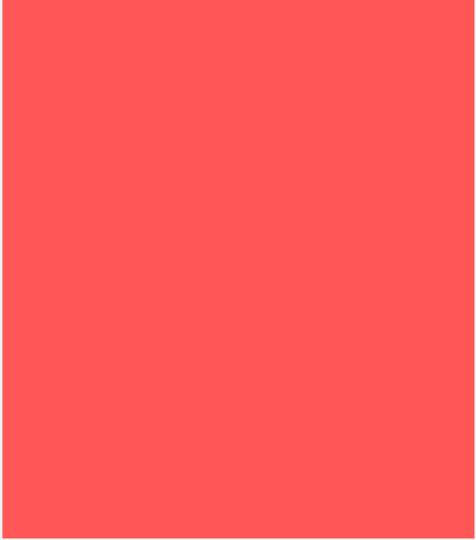

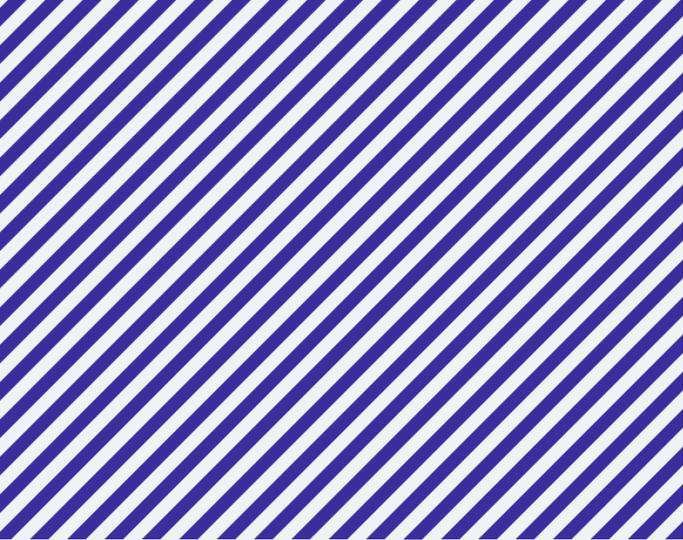

Pillar 2: Safer Roads and Mobility

Pillar 3: Safer Vehicles

Pillar 4: Safer Road Users

Pillar 5: Post-Crash Response

# Safer Roads and Mobility

---

It is in the Second Pillar where more work is needed and where the next decade 2020-2030 will make more effort striving for the overall improvement of Road Safety.

We have no doubt that one of the fundamental tools for improving Road Safety in this Second Pillar is to carry out Road Safety Audits (in all phases of Design, Construction and Exploitation of Roads), independently if these are Highways, Trunk Roads, Conventional Roads, Interurban Roads or Urban Roads.

We are fully undertaking that in order to significantly reduce Traffic Accidents, Road Safety Audits (RSAs) is one of the best tools for improving Road Safety in Infrastructures.

**In addition, for these RSAs to be effective, the Auditors must be: TRAINED, EXPERTS, INDEPENDENTS**

---

To this end, we have organised the 1st INTERNATIONAL CONGRESS OF ROAD SAFETY AUDITORS, to discuss, share experiences, and provide the Road Authorities a clear definition of Road Safety Auditors and Road Safety Audits.

# #ASEVI20

---

Seeks to become a reference space on specific topics for Road Safety Auditors with the interest of the Ibero-American community, joining experiences with the Anglo-Saxon world.

Therefore, it looks for:

## MEET EXPERTS

Gather Road Safety Auditors from all over the world and Road Safety Technicians to generate networking for the debate and exchange of experiences and information. This transfer and sharing of knowledge and information will be done amongst them and with Technical and Political Managers of the Public Road Networks.

## BE USEFUL

Develop the knowledge of Road Safety Audits and Inspections, Recognition of the Road Safety Auditors and the Road Safety Inspectors and their effectiveness in improving Road Safety.

## CREATE NETWORKING

Create an international forum which will allow to implement the concept of Road Safety Audits in every single road project across the world.

# Congress Schedule

---

## WHAT TO EXPECT

### TECHNICAL FORUMS

Presented by entities and relevant people on the field of road safety.

### SPEAKERS

10 minutes, presented by professionals interested in sharing experiences.

### EXHIBITIONS

Where companies and entities, public or private, exhibit their latest developments, products or services.

# Don't miss this opportunity
