

CIHT Qatar Group organises technical, membership and social events to maintain and enrich the working knowledge of highways and transportation professionals in Qatar.

All interested CIHT members and non-members are invited to attend.

This seminar is free of charge.

Mesaimeer Pumping Station and Outfall Project Site Visit

We are pleased to provide an opportunity for a site visit to Public Works Authority / Ashghal's Mesaimeer Pumping Station and Outfall Project.

The scope of the project includes the construction of a pumping station with 10 pumps with auxiliary facilities, and the construction of a 10 kilometer tunnel. The pumping station will operate at a capacity of 19.7 cubic meters per second, its function is to pump water from Mesaimeer Tunnel to the new outfall tunnel. This would provide a sustainable solution to discharge surface and storm water.

The site visit will comprise a project presentation on the main design aspects of the project, and a walk around the pumping station's excavation works and Tunnel Boring Machine launch shaft.

GUEST SPEAKERS Mott MacDonald's design team

DATE & TIME Saturday 26th January 2019, 9:30 am to 12 noon.
