

## **NI Transport Strategy Consultation**

*1. Are you replying on behalf of an individual or organisation?*

*Individual Organisation*

*Name of Organisation*

*2. What is your postcode?*

*postcode*

*Context*

*The last Transport Strategy was published in 2002. Since then, the Department's policy position has been updated through various strategies and policy documents. This has led to key policy messages being spread across various publications. Consequently, it can be challenging for stakeholders to access and understand the Department's policies, priorities, and ambitions for a sustainable transport network.*

*The Transport Strategy aims to bring together the policy messages into one comprehensive and overarching Strategy. This will enable stakeholders to have a clearer understanding of the context of the Department's decisions and our vision for sustainable transport and the actions required by everyone to achieve this.*

*This consultation will concentrate on emerging policies and will not revisit those elements of the strategy which are established practice or have been through previous consultations.*

### **3. To what extent do you agree with the Transport Strategy's vision?**

*To provide a sustainable, safe, accessible and effective transport system which meets the region's climate change requirements, serves the needs of urban and rural communities, and supports economic growth.*

(Required) Strongly Agree /Agree /Strongly Disagree/Disagree

Please provide comments on the vision, if any.

### **4. To what extent do you agree with the reasons for change set out in the Strategy?**

- **Traffic Congestion;**
- **Climate Change;**
- **Health and Wellbeing;**
- **Road Safety and**
- **Equality.**

(Required) Strongly Agree /Agree /Strongly Disagree/Disagree

Are there any other areas that are driving 'a need for change' in our transport network that the Transport Strategy should address?

#### *Strategic Priorities*

*This strategy is developed around four Strategic Priorities for Transport, each of which contribute to Sustainable Development Goals. These Strategic Priorities for Transport reflect the contribution that the transport system can make to the improvement of people's everyday lives, and to our society in general.*

*The priorities reflect the collective responsibility of everyone - government, business, and individuals, to embed sustainability into the decisions we make.*

*Under each strategic priority there are a range of transport measures. They do not operate in isolation rather they will work together to holistically achieve the Transport Vision to 2035.*
