

Dr Fred David Amony

I want CIHT to lead globally in understanding transport as a complex system, not just an engineering task. In five years, I hope CIHT will shape policy, practice and public debate through a deeper appreciation of complexity and global learning.

Tell us about yourself and your professional background, including why you want to be a Council Member:

I am a Chartered Engineer and infrastructure economist with over 25 years' experience spanning engineering design, operations, and policy advisory. My career has taken me across the UK, Africa and globally, working with governments, development banks and professional bodies on transport systems, infrastructure investment and public value.

I previously served as Chair of Transport Systems Economics, PIARC, where I led international work across more than 120 countries, helping shift thinking from narrow project appraisal towards systems-based, socially grounded analysis. More recently, my work has focused on complexity, institutional performance and how infrastructure interacts with norms, behaviour and governance.

I am seeking election to Council because CIHT sits at a pivotal moment. Our profession must move beyond delivery alone and help shape how society understands infrastructure as a living system. I would bring a global perspective, strong policy insight and a commitment to strengthening CIHT's intellectual leadership and public voice.

How will your particular skills and experience benefit Council? Give some examples from your professional or personal life that show you have the right skill set to contribute to the work of Council.

Strategic infrastructure thinking, linking engineering delivery with public value, governance and societal outcomes

Systems and complexity analysis, helping organisations move beyond linear appraisal and narrow cost-benefit frames

Policy advisory experience with governments, regulators and development institutions, translating technical insight into decision-ready guidance

International leadership, including chairing and coordinating multi-country professional and technical networks

Transport systems economics, investment appraisal and whole-life performance assessment

Election of Ordinary Members to Council 2026/27

Candidate Statements

Strong understanding of institutions, professional standards and how norms and behaviour shape infrastructure outcomes

Clear communicator, able to bridge engineers, policymakers and the public

Commitment to mentoring, professional development and strengthening the standing and influence of the engineering profession

Professional Affiliations:

- Fellow, CIHT

Education and Qualifications:

- 2012/17, PhD, Non-Ergodic Systems, London

Present Post or Occupation:

Adviser, Lyciar, and Honorary Senior Fellow, Complex Systems and Public Investment, University of Birmingham

Past and Present Service to the Institution:

- 2023/26, Council Member

Proposers: Prof. Glenn Lyons, Dr Bachar Hakim, Karen McShane, Neil Johnstone

Juan Sebastian Canavera Herrera

I would like CIHT to be recognised as the UK's leading independent voice shaping sustainable, resilient and inclusive transport, influencing policy and practice while equipping current and future professionals with the skills needed to address climate, societal and technological change.

Tell us about yourself and your professional background, including why you want to be a Council Member:

I am a civil engineer specialised in urban resilience and climate adaptation of civil infrastructure. I am a Chartered Environmentalist and Chartered Engineer, with a PhD from the University of Cambridge in climate change adaptation planning of urban road infrastructure. I have several years of experience delivering sustainability and resilience projects internationally, working with organisations including the World Bank, EBRD, Network Rail and Heathrow Airport.

I have been an active CIHT member since 2024 and am keen to contribute at the Council level to help shape the Institution's strategic direction. I am particularly motivated to support CIHT's leadership on climate resilience and sustainability, advising the Board of Trustees on how these issues can be embedded across policy, guidance and professional practice. I would also bring the perspective of emerging professionals, helping ensure CIHT remains forward-looking, relevant and influential within the UK transport sector.

How will your particular skills and experience benefit Council? Give some examples from your professional or personal life that show you have the right skill set to contribute to the work of Council.

My skills and experience would enable me to contribute effectively to the Council's strategic and advisory role. I have extensive experience translating complex environmental, climate risk and resilience evidence into clear, strategic recommendations for senior decision-makers across the public and private sectors. This has been developed through technical and consultancy roles on projects for organisations including the EBRD and Network Rail.

Through my academic and professional background, I am well placed to bridge research, policy and practice, supporting CIHT's role as a learned society and trusted technical authority. I bring strong communication skills developed through multidisciplinary and cross-sector collaboration, enabling me to act as an effective sounding board and critical friend. For example, these skills have been central to my work with the World Road Association. As an emerging professional, I also offer insight into the priorities shaping the future of the transport profession, supporting the Council's forward-looking decision-making.

Election of Ordinary Members to Council 2026/27

Candidate Statements

Professional Affiliations:

- Graduate, Institution of Civil Engineers (ICE)
- Full Member, Institute of Sustainability and Environmental Practitioners (ISEP)

Education and Qualifications:

- August 2008 – September 2014, Degree of Honour in Civil Engineering, National University of Colombia
- October 2015 – October 2016, MRes in Future Infrastructure and Built Environment, University of Cambridge
- October 2016 – March 2020, PhD in Future Infrastructure and Built Environment, University of Cambridge
- May 2025 to present, Chartered Environmentalist (CEnv), Society for the Environment
- October 2025 to present, Chartered Engineer (CEng), Engineering Council

Present Post or Occupation:

Senior Sustainability Engineer, Foster + Partners, January 2023 to present

Past and Present Service to the Institution:

- January 2025 - present, CIHT Technical Champion in Climate Resilience
- 23 January 2025, CIHT Masterclass: Resilience - Speaker
- 20 August 2025, Author, News Article, Climate adaptation research and innovation needs identified for the UK's transport sector
- October 2024, Contributed to the CIHT Report "Delivering a resilient transport network"

Proposers: Antoneta Horbury, Neil Johnstone, Justin Ward, Stelios Rodoulis

Steven Dennis Carmody

I am committed to promoting sustainability and environmental responsibility, ensuring our members are equipped to meet these critical challenges. I also believe in the importance of influencing government decision-makers to advance our industry's priorities.

Tell us about yourself and your professional background, including why you want to be a Council Member:

I am deeply committed to advancing our industry and ensuring that all members, particularly graduates and apprentices, have the support and opportunities they need to succeed. My aspiration as a Council Member is to represent the interests of the wider membership while fostering stronger engagement with contractors and professionals across the highways and transport sector.

With over 25 years in infrastructure, I have a proven track record of Leadership bringing balance to situations and acting Selflessly, with Integrity, Objectivity, Accountability Openness and Honesty. All of these are key for a role within the Institution and for the wider benefit of the industry.

I also serve as Chair of the Board of Governors at Leeds College of Building, the UK's leading construction college. This position allows me to support pathways into careers in Highways and Transportation while gaining valuable understanding of the education sector's challenges and opportunities.

How will your particular skills and experience benefit Council? Give some examples from your professional or personal life that show you have the right skill set to contribute to the work of Council.

As Managing Director of SCP, a Transport Planning and Infrastructure consultancy within the RSK Group, I bring extensive experience and insight. RSK, with over 19,000 employees worldwide, is a leader in environmental and sustainability consultancy. This connection enables me to champion innovation and sustainability within our Institution and help members develop future-ready skills.

My greatest strength lies in the breadth and depth of my experience across multiple sectors. As a Managing Director, I have the influence and leadership skills to drive positive change within the industry and the Institution. I have successfully led teams on local and trunk road schemes, as well as major planning inquiries. My technical expertise as a Civil Engineer and Project Director is complemented by strong leadership and strategic thinking. These qualities enable me to contribute to Council's work on shaping policy, guiding best practice, and supporting members.

- 2024 to 2026, Board of Trustee Member CIHT

Proposers: Michal Chung, Sara Terrey, Charlene Wortley, Jay Green

Claudia Currie

My ambitions for CIHT is we continue providing support for all professionals working in the transportation industry by providing a natural home for technical knowledge information sharing alongside providing routes to professional recognition - so more members and more knowledge sharing!

Tell us about yourself and your professional background, including why you want to be a Council Member:

I am a transport planner who has worked within, and project managed, multi-disciplinary teams in delivering transportation infrastructure projects across all modes and providing planning advice across across the UK for both public and private sectors.

Being a Council Member of CIHT has allowed me to grown with their support into the 'go to' expert for mentoring and supporting individuals to reach for, and attain, their dreams - there is always a way! I have been doing this since 2006 when CIHT allowed me to fulfil 'my dream' of establishing a relevant, but tough, professional qualification for those with important non-engineering expertise and this is why I will always support CIHT in exploring change while also supporting its members to use knowledge sharing to expand their learning.

Attending Council allows me to shape the direction of travel of CIHT and provide governance ensuring CIHT remains as relevant as when I joined.

How will your particular skills and experience benefit Council? Give some examples from your professional or personal life that show you have the right skill set to contribute to the work of Council.

My years of experience working across both public and private sectors as a transport planner enables me to the quickly assess large volumes of data and organise it into a comprehensive evidence base that can be used to establish options to fit into the bigger picture - this often involves challenging the 'obvious' to establish if there are alternatives that should, and could, have been considered. Having difficult conversations with elected members, the public and other interested parties requires the keen listening skills and the ability to explain often technical issues in simple plain language and using these skills enables me to quickly assimilate CIHT's evidence and papers, disseminate and gather information from the wider Regions to ensure a census can be achieved and detrimental impact to CIHT minimised.

Council drives CIHT forwards and it is important I use an on-balance approach to all issues and minimise unintended consequences for all.

I want CIHT to be a bold, influential voice shaping the evolution of transport, with a focus on integration and decarbonisation. CIHT should be an inclusive home for our profession, offering attractive benefits that inspire loyalty and attract new members.

Tell us about yourself and your professional background, including why you want to be a Council Member:

I have been in the transport profession for over 30 years, worked in both the public and private sectors and helped contribute to the planning, appraisal and delivery of multi-modal transport projects across the world. My relationship with CIHT spans more than 25 years and I was proud to become a Fellow in 2025. My primary motivation to join the Council is to give something back to the industry, building on my experience gained as a TPS Board member for the last 6 years. I enjoy mentoring young professionals, helping with early careers advice and coaching on technical and management topics. I have held leadership roles in top tier consultancies for more than 15 years and currently lead a large group within Jacobs. I am committed to equality, diversity and inclusion both in the delivery of my people leader role and as a theme within my professional activities.

How will your particular skills and experience benefit Council? Give some examples from your professional or personal life that show you have the right skill set to contribute to the work of Council.

I will bring a blend of senior leadership skills and Board level experience to the Council that will help ensure a measured, decisive approach to CIHT business. Having worked with volunteers in my current role on the TPS Board and previously in supporting various sports clubs, I appreciate the challenges of getting things done with limited resources and the need think creatively. I am a confident communicator who is used to working alongside senior figures and I pride myself on a collaborative approach. As an active practitioner, I remain grounded in the profession and bring specific expertise in transport planning including an openness to help strengthen the strategic partnership between CIHT and TPS. Across the various groups that I lead, I strive to build an inclusive culture where everyone has a voice and feels they can bring their authentic self to the table.

Moji Farrokhzad

My ambition is for CIHT to be the confident, trusted voice of our profession — shaping policy, setting standards and championing safe, sustainable and resilient transport. I want CIHT to lead change, support future leaders, and stay practical, inclusive and influential.

Tell us about yourself and your professional background, including why you want to be a Council Member:

I have spent over 30 years working in highways and structures across client, contractor and consultancy roles, including senior positions at Kier, Transport for London and now FM Conway. Throughout my career I've been fortunate to work on some of interesting projects, from major refurbishment programmes to critical asset risk and resilience schemes.

I currently lead FM Conway's Major Frameworks portfolio, with responsibility for safety, governance, client relationships and delivery across TfL STIC and some local authority structures programme. What has always mattered most to me is not just delivering projects, but building strong teams, developing people and making sure we leave the network safer and more resilient than we found it.

I want to serve on CIHT Council because the Institution has an important part in future engineers professional journey. I'm particularly passionate about professional standards, safety leadership and supporting the next generation of engineers and leaders.

How will your particular skills and experience benefit Council? Give some examples from your professional or personal life that show you have the right skill set to contribute to the work of Council.

My career has been spent leading complex high-profile infrastructure portfolios where good governance, sound judgement and collaboration are essential. I would bring to Council a strong understanding of how strategy, standards and investment decisions translate into real-world delivery, risk and outcomes.

In my current role at FM Conway, I have full accountability for safety, governance and performance. I chair Client's meeting and balance technical, commercial and political considerations. A good example is the Croydon Flyover refurbishment, where I helped reset programme strategy, manage significant technical risk and maintain stakeholder confidence on a highly sensitive asset.

Previously at TfL and National Highways, I acted as senior sponsor and programme leader, making prioritisation, assurance and investment decisions across large asset portfolios. I also bring a

I want CIHT to become a stronger, more inclusive institution that drives sustainability and supports professional growth. In the next five years, I envision CIHT expanding its impact through collaboration, innovation, and leadership in shaping the UK's future mobility.

Tell us about yourself and your professional background, including why you want to be a Council Member:

- Chartered Engineer with over two decades of experience delivering and assuring major highway, bridge and tunnel infrastructure across London.
- Leadership roles at Transport for London, acting as a Technical Authority and Subject Matter Expert for steel bridges.
- Collaborative experience through national committees and specialist technical groups.
- Led technical assurance for complex and safety critical programmes, including the Silvertown Tunnel and Gallows Corner Flyover.
- Strong focus on public safety, sustainability and delivering long term value for the community.

I am passionate about becoming a Council Member because I believe strongly in advancing our profession through integrity, collaboration, and technical excellence. My experience across industry, government, and multidisciplinary teams has prepared me to support peers, mentor the next generation of engineers, and contribute actively to shaping the future of safe, resilient, and sustainable infrastructure delivery.

How will your particular skills and experience benefit Council? Give some examples from your professional or personal life that show you have the right skill set to contribute to the work of Council.

My skills and experience enable me to add meaningful value to the Council through technical authority, strategic leadership, and effective collaboration on major infrastructure programmes. As a Chartered Engineer and Technical Authority at TfL, I have led high risk structural assurance on schemes such as the Silvertown Tunnel and Gallows Corner Flyover, applying sound judgement to balance safety, cost, operational priorities, and long term asset performance.

Through my involvement with national committees, including the SCI and BCSA, I contribute to shaping industry standards and advancing best practice. I am skilled in stakeholder management, having worked closely with local authorities, Network Rail, consultants, and contractors to resolve complex issues and build consensus around technical decisions.

Election of Ordinary Members to Council 2026/27 Candidate Statements

I also mentor engineers and champion inclusion, supporting professional development and collaborative working. These combined experiences equip me to contribute constructively, responsibly, and strategically to the Council's work.

Professional Affiliations:

- Fellow, CIHT

Education and Qualifications:

- Sep 2005 - Oct 2006, MSc. - Structural Engineering

Present Post or Occupation:

Senior Structures Engineer, Aug 2014

Past and Present Service to the Institution:

- 17-05-2025, Mentoring
- 30-10-2025, I joined as an observer and have since progressed to reviewer.

Proposers: Makonnen Asfaw, Srirankan Sivananthan, Pedram Heshmat, Taran Nandra

Anita Solanki

I want to help shape policy that is sustainable and innovative to meet the needs of the growing transportation population. I want to see CIHT leading the way so that we have a fit for purpose network for generations ahead.

Tell us about yourself and your professional background, including why you want to be a Council Member:

I am eager to bring my experience, including my previous roles as Chair of the Highways and Utilities Committee UK and Associate Director of Street works UK, to a prestigious organisation like CIHT. As Head of Interfaces with over 21 years in the utility industry and 8 years in construction, infrastructure, rail, and highways, having won 8 awards in innovation, I have transferable skills I can utilise as Council Member.

My expertise includes stakeholder management, supply chain oversight, regulatory compliance, and relationship-building across the UK's highways and utilities sectors. I also have a strong background in influencing legislation, implementing training programs, and aligning strategies with budgetary goals.

With a robust network and the ability to foster collaboration, I am passionate about using my experience to shape policy and drive innovative, sustainable solutions that address challenges in the transport and highways sector, helping CIHT remain at the forefront of the industry.

How will your particular skills and experience benefit Council? Give some examples from your professional or personal life that show you have the right skill set to contribute to the work of Council.

CIHT is a reputable organisation, I want to support by helping to shape policy fit for the future by applying sustainable and innovative thinking.

In my previous roles, Associate Director for Street Works UK, I represented Tier 1 contractors across the UK utility industry, driving collaboration across a complex stakeholder landscape. At Severn Trent Water, I chaired the WMHAUC regional committee and co-chaired the HAUC UK National Roadshow and National Performance Group, collaborating with software developers and the Department for Transport (DfT).

With expertise in lean management, stakeholder engagement, business process improvement, project management, and public speaking, I have built strong relationships with highway authorities. My ability to facilitate workshops, manage large-scale projects has delivered measurable results and positive change.

Election of Ordinary Members to Council 2026/27

Candidate Statements

I am confident that my experience and collaborative approach will allow me to add value to the Council's work and further its mission to serve the community effectively.

Professional Affiliations:

Proposers: Richard Harrison, Karl Simpson, Simon Townsend, Steve Hellyer

Craig Wood

My ambition is for CIHT to be the leading voice shaping the future of highways and transportation. In five years, I want CIHT to be more influential, inclusive and visible, driving safety, sustainability, innovation & increased member engagement across the profession.

Tell us about yourself and your professional background, including why you want to be a Council Member:

I am an award-winning and highly motivated manager with over fifteen years' experience in the Highways industry. A strong track record of leading operational, commercial and contractual delivery through effective supply chain management. I drive performance through multidisciplinary collaboration, efficiency savings, safety innovation, and strong customer and stakeholder relationships.

I am passionate about making a meaningful impact within the Highways and Transportation sector and currently work in a role that allows me to shape, influence and deliver positive change. I am motivated to become a CIHT Council Member to contribute strategic insight, support the development of future talent, champion engagement with existing members, attract new members to the Institution, and help ensure CIHT continues to lead, represent and influence the profession whilst responding to the challenges and opportunities facing the industry. I bring credibility, experience, energy, and a collaborative leadership style aligned with the CIHT values and long-term strategic commitment.

How will your particular skills and experience benefit Council? Give some examples from your professional or personal life that show you have the right skill set to contribute to the work of Council.

I bring over fifteen years of senior leadership experience in the Highways industry, with proven strengths in strategic thinking, governance, collaboration and delivery. I currently strategically oversee operational, commercial and contractual programmes, working closely with diverse supply chain partners to drive performance, efficiency and safety outcomes. This experience would allow me to contribute confidently to Council discussions and decision-making.

Throughout my career, I have worked across multidisciplinary teams, balancing competing priorities whilst building consensus and maintaining strong stakeholder relationships. As an award-winning manager, I have led service improvement initiatives, introduced innovative safety practices and delivered measurable efficiencies, demonstrating an ability to translate strategy into action.

Election of Ordinary Members to Council 2026/27

Candidate Statements

Beyond my professional role, I actively mentor emerging professionals and support talent development, reflecting my commitment to inclusivity and future leadership. I bring energy, credibility and a collaborative approach, enabling me to challenge constructively, support colleagues and add value to governance and direction of Council.

Chris Young

In 5 years, I'd like CIHT to be more visible, more inclusive, and central to the big conversations in transport. My ambition is to help the Institution grow its influence while staying connected to the needs of its members.

Tell us about yourself and your professional background, including why you want to be a Council Member:

I've worked in the highways and transportation sector for over two decades, starting out as a local authority Highways Technician and now as a Board Director at Waterman Aspen.

I currently lead multiple transportation focussed business units, and play a key role in delivering our business strategy, overseeing financial performance and leading our digital transformation programme.

CIHT has been part of my journey for many years. I've held various roles including regional Committee Member, Chair of the Region, Council Representative and Director of Appian. I've organised events, contributed to strategy and policy discussions and helped steer commercial governance.

These experiences have shown me just how important CIHT is. Not just as a professional body but as a community. I'm standing as I want to continue contributing to that community, supporting members at every stage of their career and helping CIHT remain a relevant, inclusive and respected voice in our sector.

How will your particular skills and experience benefit Council? Give some examples from your professional or personal life that show you have the right skill set to contribute to the work of Council.

Over the last 20 years I've developed a wide range of skills across leadership, strategy, mentoring and delivery. As a Board Director at Waterman Aspen, I lead national business units and contribute to our strategic direction, digital transformation and organisational growth. I manage a team of around 300 professionals and work closely with clients, partners and internal teams to drive performance and innovation.

My involvement with CIHT over many years has strengthened my governance and communication skills. I've served as a Council Member, Chair of the West Midlands region, and Director of Appian Trading. These roles have given me insight into policy, member engagement and financial oversight.

Election of Ordinary Members to Council 2026/27

Candidate Statements

I'm also a strong advocate for people development, leading mentoring programmes, CPD events and STEM. I enjoy bringing people together, building inclusive teams and creating opportunities for others to grow. I bring a practical, collaborative and forward-thinking mindset to everything I do.
